

Technologies for our future

Alessandro Matera

Delegate representative of the Technical Innovation and Research Committee
of ANIE Federation & Vice President of ANIE Electronic Components

Technologies for our future

ANIE FEDERATION

Overview

- **ANIE, with over 1,100 member companies, represents the Italian Electrical and Electronics Industry**

- **14 Associations:**

Lifts and escalators

Industrial Automation

Electrical cables and conductors

Components and systems for plants

Electronic components

Energy

Lighting

Industrial plant engineering

Railway industries

Networks

Renewables

Security and building automation

Telecommunication system integrators

Private security and trust services

- **The sector in figures (2022)**

€ 93 billion in total turnover

400.000 employees

4% intra-muros R&D expenditure on total turnover

- ANIE provides state-of-the-art systems and technology solutions for the following **strategic markets:**

INDUSTRY

BUILDING

ENERGY

INFRASTRUCTURE

Technologies for our future

ANIE ELECTRONIC COMPONENTS

Overview

- ANIE Electronic Components is an expression of the nationwide electronic components industry and suppliers of enabling technologies for digital transformation. The Association represents the entire value chain from basic technologies to systems integration.
- Its membership in Federazione ANIE and Confindustria makes it a recognized interlocutor in national and international institutional forums, while enabling it to take advantage of synergies with all industrial chains in the system.
- The Association's strategic activities mainly concern: institutional relations; education; technology transfer; collaboration with supply chains.
